Independent Auditor's Report

The School Board Frederick Area School District No. 6-2 Frederick, South Dakota

Report on the Financial Statements

We have audited the accompanying financial statements of the governmental activities, the businesstype activities, each major fund, and the aggregate remaining fund information of the Frederick Area School District No. 6-2 (the School District) as of and for the year ended June 30, 2019, and the related notes to the financial statements, which collectively comprise the School District's basic financial statements as listed in the table of contents.

Management's Responsibility for the Financial Statements

Management is responsible for the preparation and fair presentation of these financial statements in accordance with accounting principles generally accepted in the United States of America; this includes the design, implementation, and maintenance of internal control relevant to the preparation and fair presentation of financial statements that are free from material misstatement, whether due to fraud or error.

Auditor's Responsibility

Our responsibility is to express opinions of these financial statements based on our audits. We conducted our audits in accordance with auditing standards generally accepted in the United States of America and the standards applicable to financial audits contained in *Government Auditing Standards*, issued by the Comptroller General of the United States. Those standards require that we plan and perform the audits to obtain reasonable assurance about whether the financial statements are free from material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the financial statements. The procedures selected depend on the auditor's judgment, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error. In making those risk assessments, the auditor considers internal control relevant to the entity's preparation and fair presentation of the financial statements in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the entity's internal control. Accordingly, we express no such opinion. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of significant accounting estimates made by management, as well as evaluating the overall presentation of the financial statements.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinions.

Opinions

In our opinion, the financial statements referred to above present fairly, in all material respects, the respective financial position of the governmental activities, the business-type activities, each major fund, and the aggregate remaining fund information of the School District as of June 30, 2019, and the respective changes in financial position and, where applicable, cash flows thereof for the year then ended in accordance with accounting principles generally accepted in the United States of America.

Other Matters

Required Supplementary Information

Accounting principles generally accepted in the United States of America require that the schedule of employer's share of net pension liability (asset), schedule of employer's contributions, and budgetary comparison information on pages 35 through 43 be presented to supplement the basic financial statements. Such information, although not a part of the basic financial statements, is required by the Governmental Accounting Standards Board, who considers it to be an essential part of financial reporting for placing the basic financial statements in an appropriate operational, economic, or historical context. We have applied certain limited procedures to the required supplementary information in accordance with auditing standards generally accepted in the United States of America, which consisted of inquires of management about the methods of preparing the information and comparing the information for consistency with management's responses to our inquires, the basic financial statements. We do not express an opinion or provide any assurance on the information because the limited procedures do not provide us with sufficient evidence to express an opinion or provide any assurance.

Management has omitted the management's discussion and analysis that the accounting principles generally accepted in the United States of America require to be presented to supplement the basic financial statements. Such missing information, although not a part of the basic financial statements, is required by the Governmental Accounting Standards Board, who considers it to be an essential part of financial reporting for placing the basic financial statements in an appropriate operational, economic, or historical context. Our opinion on the basic financial statements is not affected by the missing information.

Other Reporting Required by Government Auditing Standards

In accordance with *Government Auditing Standards*, we have also issued our report dated January 16, 2020, on our consideration of the School District's internal control over financial reporting and on our tests of its compliance with certain provisions of laws, regulations, contracts, grant agreements, and other matters. The purpose of that report is solely to describe the scope of our testing of internal control over financial reporting and compliance and the results of that testing, and not to provide an opinion on the effectiveness of the School's internal control over financial reporting or on compliance. That report is an integral part of an audit performed in accordance with *Government Auditing Standards* in considering the School District's internal control over financial reporting and compliance.

Ende Bailly LLP

Reconciliation of the Governmental Funds Balance Sheet to the Statement of Net Position

Total Fund Balances - Governmental Funds	\$ 3,849,622
Amounts Reported for Governmental Activities in the Statement of Net Position are Different Because:	
Capital assets used in governmental activities are not current financial resources and, therefore, are not reported in the funds.	2,050,017
Property taxes become due and payable on January 1, each year, but are not collected/available soon enough to pay current period expenditures; therefore, they are reported as deferred revenue in the fund financial statements. However, because the delinquent taxes are payable by the taxpayer at June 30, the delinquent taxes are reported as revenue on the government-wide financial statements.	5,396
Net pension liability (asset), pension related deferred inflows of resources, and pension related deferred outflows of resources do not represent available financial resources and, therefore, are not available financial resources and, therefore, are not reported in the funds.	 356,333
Net Position - Governmental Funds	\$ 6,261,368

Reconciliation of the Statements of Revenues, Expenditures and Changes in Fund Balances to the Government-Wide Statement of Activities

Year Ended June	30,	2019
-----------------	-----	------

	 2019
Net Change in Fund Balances - Total Governmental Funds	\$ 378,052
Amounts Reported for Governmental Activities in the Statement of Activities Are Different Because:	
Governmental funds report capital outlays as expenditures; however, in the statements of activities the cost of those assets is allocated over their estimated useful lives and reported as as depreciation expense. This is the amount by which depreciation (\$140,120) was exceeded by capital outlay	46 221
(\$186,451) in 2019.	46,331
The fund financial statement governmental fund property tax accruals differ from the government wide statement property tax accruals in that the fund financial statements require the amounts to be "available."	(2,203)
Expenses or reductions of expenses related to pensions reported in	
the statement of activities do not require the use of current financial resources and, therefore, are not reported in the funds.	 (97,812)
Change in Net Position of Governmental Activities	\$ 324,368

Note 1 - Summary of Significant Accounting Policies

The accounting policies of Frederick Area School District No. 6-2 (the School District) conform to generally accepted accounting principles applicable to government entities in the United States of America.

Financial Reporting Entity

The reporting entity of the Frederick Area School District No. 6-2 consists of the primary government (which includes all of the funds, organizations, institutions, agencies, departments, and offices that make up the legal entity, plus those funds for which the primary government has a fiduciary responsibility, even though those fiduciary funds may represent organizations that do not meet the criteria for inclusion in the School District); those organizations for which the primary government is financially accountable; and other organizations for which the ir elationship with the primary government are such that their exclusion would cause the School District's financial statements to be misleading or incomplete.

Component units are legally separate organizations for which the elected officials of the primary government are financially accountable. The School District is financially accountable if its governing board appoints a voting majority of another organization's governing body and it has the ability to impose its will on that organization, or there is a potential for that organization to provide specific financial benefits to, or impose specific financial burdens on, the School District (primary government). The School District may also be financially accountable for another organization if that organization is fiscally dependent on the School District. The School District has no component units.

The School District participates in a cooperative service unit with several other school districts. See detailed note entitled "Joint Ventures" for specific disclosures. Joint ventures do not meet the criteria for inclusion in the School District as a component unit but are discussed in these notes because of the nature of their relationship with the School District.

Basis of Presentation

The financial statements of the School District have been prepared in accordance with generally accepted accounting principles (GAAP) as prescribed by the Governmental Accounting Standards Board (GASB). The GASB is the standard setting body for governmental accounting and financial reporting.

Government-Wide Financial Statements - The statement of net position and statements of activities display information about the School District as a whole. They include all funds of the School District except for fiduciary funds. The statements distinguish between governmental and business-type activities. Governmental activities generally are financed through taxes, intergovernmental revenues, and other non-exchange revenues. Businesstype activities are financed in whole or in part by fees charged to external parties for goods or services.

The statement of net position reports all financial and capital resources in a net position form (assets plus deferred outflows of resources minus liabilities minus deferred inflows of resources equal net position). Net position is displayed in three components, as applicable, including net investment in capital assets, restricted (distinguishing between major categories of restrictions), and unrestricted.

The statements of activities present a comparison between direct expenses and program revenues for each segment of the business-type activities of the School District and for each function of the School District's governmental activities. Direct expenses are those that are specifically associated with a program or function and, therefore, are clearly identifiable to a particular function. Program revenues include (a) charges paid by recipients of goods and services offered by the programs, and (b) grants and contributions that are restricted to meeting the operational or capital requirements of a particular program. Revenues that are not classified as program revenues, including all taxes, are presented as general revenues.

Fund Financial Statements - Fund financial statements of the School District are organized into funds, each of which is considered to be a separate accounting entity. Each fund is accounted for by providing a separate set of self-balancing accounts that constitutes its assets, liabilities, fund equity, revenues, and expenditures/expenses. Funds are organized into three major categories: governmental, proprietary, and fiduciary. An emphasis is placed on major funds within the governmental and proprietary categories. A fund is considered major if it is the primary operating fund of the School District or if it meets the following criteria:

- 1. Total assets, liabilities, revenues, or expenditures/expenses of the individual governmental or enterprise fund are at least 10% of the corresponding total for all funds of that category or type; and
- 2. Total assets, liabilities, revenues, or expenditures/expenses of the individual governmental or enterprise fund are at least 5% of the corresponding total for all governmental and enterprise funds combined; or
- 3. Management has elected to classify one or more governmental or enterprise funds as major for consistency in reporting from year to year, or because of public interest in the fund's operations.

Proprietary fund operating revenues, such as charges for services, result from exchange transactions associated with the principal activity of the fund. Exchange transactions are those in which each party receives and gives up essentially equal values. Nonoperating revenues, such as subsidies and investment earnings, result from nonexchange transactions or ancillary services.

The funds of the School District are described below within their respective fund types.

Governmental Funds

General Fund - A fund established by South Dakota Codified Laws (SDCL) 13-16-3 to meet all the general operational costs of the School District, excluding Capital Outlay Fund and Special Education Fund expenditures. The General Fund is always a major fund.

Special Revenue Fund Types - Special revenue funds are used to account for the proceeds of specific revenue sources that are legally restricted to expenditures for specified purposes. The Capital Outlay, Special Education, and Pension Fund are the special revenue funds maintained by the School District.

Capital Outlay Fund - A fund established by SDCL 13-16-6 to meet expenditures that result in the lease of, acquisition of, or additions to real property, plant or equipment, textbooks, and instructional software. This fund is financed by property taxes and grants. This is a major fund.

Special Education Fund - A fund established by SDCL 13-37-16 to pay the costs for the special education of all children in need of special assistance and prolonged assistance who reside within the School District. This fund is financed by grants and property taxes. This is a major fund.

Pension Fund – A fund established by SDCL 13-10-6 for the purpose of paying pensions to retired employees of school districts, which have established such systems, paying the School District's share of retirement plan contributions, and for funding early retirement benefits to qualifying employees. This fund is financed by property taxes. This is a major fund.

Proprietary Funds

Enterprise Funds - Enterprise funds are used to account for operations that are financed and operated in a manner similar to private business enterprises, where the intent of the governing body is that costs of providing goods and services be financed or recovered primarily through user charges. The Food Service Fund and Driver Education Fund are the enterprise funds of the School District.

Food Service Fund - A fund used to record financial transactions related to food service operations. This fund is financed by user charges and grants. This is a major fund.

Driver Education Fund – A fund used to record financial transactions related to the driver education program. This fund is financed by user charges. This is a major fund.

Fiduciary Funds

Fiduciary funds are never considered to be major funds.

Private Purpose Trust Fund - Two trust funds of the School District were created to hold funds in trust for the benefit of giving scholarships to School District graduates to help cover the costs of higher education. All accumulated earnings on these invested resources may be used to support the disbursement of scholarships to graduates of the School District.

Agency Fund - The student activity fund is used to account for student funds generated within the various schools by the students or other School District organizations. The School District holds the student activity fund's assets in a custodial capacity. Because agency funds are custodial in nature, they do not measure results of operations.

Measurement Focus and Basis of Accounting

Measurement focus is a term used to describe "how" transactions are recorded within the various financial statements. Basis of accounting refers to "when" revenues and expenditures or expenses are recognized in the accounts and reported in the financial statements, regardless of the measurement focus.

Measurement Focus

Government-Wide Financial Statements - In the government-wide statement of net position and statements of activities, both governmental and business-type activities are presented using the economic resources measurement focus, applied on the accrual basis of accounting.

Fund Financial Statements - In the fund financial statements, the current financial resources measurement focus and the modified accrual basis of accounting are applied to governmental funds, while the economic resources measurement focus and the accrual basis of accounting are applied to the proprietary and fiduciary funds.

Basis of Accounting

Government-Wide Financial Statements - In the government-wide statement of net position and statements of activities, governmental and business-type activities are presented using the accrual basis of accounting. Under the accrual basis of accounting, revenues and related assets generally are recorded when earned (usually when the right to receive cash vests) and expenses and related liabilities are recorded when an obligation is incurred (usually when the obligation to pay cash in the future vests).

Fund Financial Statements - All governmental fund types are accounted for using the modified accrual basis of accounting. Their revenues generally are recognized when they become measurable and available. "Available" means resources are collected or to be collected soon enough after the end of the fiscal year that they can be used to pay the bills of the current period. The accrual period does not exceed one bill-paying cycle and, for the School District, the length of that cycle is 60 days. The revenues which are accrued at June 30, 2019, are due from the federal government.

Expenditures generally are recognized when the related fund liability is incurred. Exceptions to this general rule include principal and interest on general long-term debt, which are recognized when due.

All proprietary funds and fiduciary funds are accounted for using the accrual basis of accounting. Their revenues are recognized when they are earned, and their expenses are recognized when they are incurred.

Interfund Eliminations and Reclassifications

Government-Wide Financial Statements

In the process of aggregating data for the government-wide financial statements, some amounts reported as interfund activity and balances in the fund financial statements have been eliminated or reclassified as follows:

In order to minimize the grossing-up effect on assets and liabilities within the governmental and business-type activities columns of the primary government, amounts reported as interfund receivables and payables have been eliminated in the governmental and business-type activities columns, except for the net residual amounts due between governmental and business-type activities, which are presented as internal balances.

Fund Financial Statements

Noncurrent portions of long-term interfund receivables are reported as nonspendable fund balance to the extent that the proceeds from the collection of those receivables are not restricted, committed, or assigned. Current portions of interfund receivables are considered "available spendable resources" and are reported in the appropriate fund balance category.

Inventory

Inventory is stated at the lower of cost or market. The cost valuation method is first-in, first out (FIFO). Donated commodities are valued at estimated market value based on the USDA price list at date of receipt. In the government-wide financial statements and the proprietary funds in the fund financial statements, inventory items are initially recorded as assets and charged to expense in the various functions of government as they are consumed. In the fund financial statements, inventories in the General Fund and Special Revenue Funds consist of expendable supplies held for consumption. The cost is recorded as an expenditure at the time individual inventory items are purchased. Reported inventories are considered nonspendable fund balances as they do not constitute "available spendable resources." The School District did not have any material amounts of inventory in the General Fund or Special Revenue Funds.

Capital Assets

Capital assets include land, buildings, and machinery and equipment that are used in operations and that have initial useful lives extending beyond a single reporting period.

The accounting treatment over capital assets depends on whether the assets are used in governmental fund operations or proprietary fund operations and whether they are reported in the government-wide or fund financial statements.

Government-Wide Statements - All capital assets are valued at historical cost or estimated historical cost if actual historical cost is not available. Donated capital assets are valued at their estimated fair value on the date donated.

Interest costs incurred during construction of general capital assets are not capitalized along with other capital asset costs.

The June 30, 2019, balance of capital assets for governmental activities includes approximately 11% for which the costs were determined by estimates of the original costs. These estimated original costs were established by deflating the current replacement cost. The total June 30, 2019, balance of capital assets for business-type activities are all valued at original cost.

Depreciation of all exhaustible fixed assets is recorded as an allocated expense in the government-wide statements of activities, with net capital assets reflected in the statement of net position. Capitalization thresholds (the dollar values above which asset acquisitions are added to the capital asset accounts), depreciation methods, and estimated useful lives of capital assets reported in the government-wide statements and proprietary funds are as follows:

		talization reshold	Depreciation Method	Estimated Useful Life
Land*	\$	1,000	N/A	N/A
Food service equipment		1,000	Straight-Line	12 years
Buildings and improvements		5,000	Straight-Line	33-50 years
Machinery and equipment		5,000	Straight-Line	5-20 years
*I and is an inexhaustible canital asse	t and is not denr	erinted	2	

Land is an inexhaustible capital asset and is not depreciated

Fund Financial Statements - In the fund financial statements, capital assets used in governmental fund operations are accounted for as capital expenditures of the appropriate governmental fund upon acquisition. Capital assets used in proprietary fund operations are accounted for on the accrual basis, the same as in the government-wide statements.

Noncurrent Liabilities

The accounting treatment of noncurrent liabilities depends on whether the assets are used in governmental fund operations or proprietary fund operations and whether they are reported in the government-wide or fund financial statements.

All noncurrent liabilities to be repaid from governmental and business-type resources are reported as liabilities in the government-wide statements. The School District does not have any noncurrent liabilities.

In the fund financial statements, debt proceeds are reported as revenues (other financing sources), while payments of principal and interest are reported as expenditures when they become due. The accounting for proprietary fund debt is on the accrual basis, the same in the fund statements as in the government-wide statements.

Deferred Outflows and Inflows of Resources

In addition to assets, the statement of financial position will sometimes report a separate section for deferred outflows of resources. This separate financial statement element, deferred outflows of resources, represents a consumption of net position that applies to a future period(s) and so will not be recognized as an outflow of resources (expense/ expenditure) until then. The School District has two items that qualify for reporting in this category. They are the contributions made to pension plans after the measurement date and prior to the fiscal year-end, and changes in the net pension liability (asset) not included in pension revenue/expense reported in the government-wide statement of net position.

In addition to liabilities, the statement of financial position will sometimes report a separate section for deferred inflows of resources. This separate financial statement element, deferred inflows of resources, represents an acquisition of net position that applies to a future period(s) and so will not be recognized as an inflow of resources (revenue) until that time. The School District has two types of items that qualify for reporting in this category. The School District reports unavailable revenues from property taxes on the government-wide statement of net position and the governmental funds balance sheet. These amounts are deferred and recognized as an inflow of resources in the period that the amounts become available. The other item is changes in the net pension liability (asset) not included in pension revenue/expense reported in the government-wide statement of net position.

Program Revenues

In the government-wide statements of activities, reported program revenues derive directly from the program itself or from parties other than the School District's taxpayers or citizenry as a whole. Program revenues are classified into three categories as follows:

- 1. Charges for Services These arise from charges to customers, applicants, or others who purchase, use, or directly benefit from the goods, services, or privileges provided, or are otherwise directly affected by the services.
- 2. Program-Specific Operating Grants and Contributions These arise from mandatory and voluntary nonexchange transactions with other governments, organizations, or individuals that are restricted for use in a particular program.
- 3. Program-Specific Capital Grants and Contributions These arise from mandatory and voluntary nonexchange transactions with other governments, organizations, or individuals that are restricted for the acquisition of capital assets for use in a particular program.

Property Taxes

Property taxes are levied on or before each October 1, attached as an enforceable lien on property the following January 1, and are payable in two installments on or before the following April 30 and October 31. The county bills and collects the School District's taxes and remits them to the School District.

School District property tax revenues are recognized to the extent they are used to finance each year's appropriations. Revenue related to current year property taxes receivable that is not intended to be used to finance the current year's appropriations and are not susceptible to accrual has been reported as deferred revenue in both the fund financial statements and the government-wide financial statements. Additionally, in the fund financial statements, revenue from property taxes may be limited by an amount not collected during the fiscal period or within the "availability period."

Proprietary Funds Revenue and Expense Classifications

Proprietary fund operating revenues, such as charges for services, result from exchange transactions associated with the principal activity of the fund. Exchange transactions are those in which each party receives and gives up essentially equal values. Nonoperating revenues, such as subsidies and investment earnings, result from nonexchange transactions or ancillary activities.

In the proprietary fund's statement of activities, revenues and expenses are classified in a manner consistent with how they are classified in the statement of cash flows. That is, transactions for which related cash flows are reported as capital and related financing activities, noncapital financing activities, or investing activities are not reported as components of operating revenues or expenses.

Cash and Cash Equivalents

The School District pools its cash resources for deposit purposes. Accordingly, the enterprise fund has access to its cash resources on demand. Accordingly, all reported enterprise fund deposit balances are considered to be cash equivalents for the purpose of the statement of cash flows.

Deposits and Investments

For the purpose of financial reporting, "cash and cash equivalents" includes all demand and savings accounts and certificates of deposit. Investments in open-end mutual fund shares, or similar investments in external investment pools, are also considered to be cash equivalents.

Equity Classifications

Government-Wide Statements - Equity is classified as net position and is displayed in three components:

- 1. Net Investment in Capital Assets Consists of capital assets, including restricted capital assets, net of accumulated depreciation (if applicable), reduced by the outstanding balances of any bonds, mortgages, notes, or other borrowings that are attributable to the acquisition, construction, or improvement of those assets.
- 2. Restricted Net Position Consists of net assets with constraints placed on their use either by (a) external groups such as creditors, grantors, contributors, or laws and regulations of other governments; or (b) law through constitutional provisions or enabling legislation.
- 3. Unrestricted Net Position All other net assets that do not meet the definition of "restricted" or "net investment in capital assets."

Fund Financial Statements

Governmental fund equity is classified as fund balance and is distinguished between nonspendable, restricted, committed, assigned, or unassigned components. Proprietary fund equity is classified the same as in the government-wide financial statements. Fiduciary fund equity (except for Agency Funds, which have no fund equity) is reported as net position held in trust for other purposes.

Application of Net Position

It is the School District's policy to first use restricted net position, prior to the use of unrestricted net position, when an expense is incurred for purposes for which both restricted and unrestricted net position are available.

Fund Balance Classification Policies and Procedures

The School District classifies governmental fund balance as follows:

- Nonspendable Includes fund balance amounts that cannot be spent either because it is not in spendable form or because of legal or contractual restraints.
- Restricted Includes fund balance amounts that are constrained for specific purposes which are externally
 imposed by providers, such as creditors, or amounts constrained due to constitutional provisions or
 enabling legislation.
- Committed Includes fund balance amounts that are constrained for specific purposes that are internally imposed by the government through formal action of the highest level of decision making authority and does not lapse at year-end.
- Assigned Includes fund balance amounts that are intended to be used for specific purposes that are neither considered restricted nor committed. Fund balance may be assigned by the School Board or Business Manager.
- Unassigned Includes positive fund balance within the General Fund which has not been classified within the above-mentioned categories and negative fund balances in other governmental funds.

The School District uses restricted/committed amounts first when both restricted and unrestricted fund balance is available unless there are legal documents/contracts that prohibit doing this, such as grant agreements requiring dollar-for-dollar spending. Additionally, the government would first use committed, then assigned, and, lastly, unassigned amounts of unrestricted fund balance when expenditures are made.

The School District does not have a formal minimum fund balance policy.

The purpose of each major special revenue fund and revenue source is listed below:

Major Special Revenue Fund

Capital Outlay Fund Special Education Fund Pension Fund Revenue Source

Grants and property taxes Grants and property taxes Property taxes

Pensions

For purposes of measuring the net pension liability (asset), deferred outflows/inflows of resources, and pension expense and revenue, information about the fiduciary net position of the South Dakota Retirement System (SDRS) and additions to/deductions from SDRS's fiduciary net position have been determined on the same basis as they are reported by SDRS. For this purpose, plan contributions are recognized as of employer payroll paid dates and benefit payments and refunds are recognized when due and payable in accordance with the benefit terms. Investments are reported at fair value.

Rounding

Computer generated rounding variances may exist in the basic financial statements and required supplementary information. The variances result from values being entered with cents rather than as whole numbers.

Note 2 - Deposits and Investments Credit Risk, Concentrations of Credit Risk, and Interest Rate Risk

The School District follows the practice of aggregating the cash assets of various funds to maximize cash management efficiency and returns. Various restrictions on deposits and investments are imposed by statutes. These restrictions are summarized below.

Deposits

The School District's deposits are made in qualified public depositories as defined by SDCL 4-6A-1, 13-16-15, 13-16-15.1, and 13-16-18.1. Qualified depositories are required by SDCL 4-6A-3 to maintain, at all times, segregated from their other assets, eligible collateral having a value equal to at least 100% of the public deposit accounts which exceed deposit insurance such as the FDIC and NCUA. In lieu of pledging eligible securities, a qualified public depository may furnish irrevocable standby letters of credit issued by federal home loan banks accompanied by written evidence of that bank's public debt rating, which may not be less than "AA," or a qualified public depository may furnish a corporate surety bond of a corporation authorized to do business in South Dakota.

Deposits are recorded at cost plus interest if the account is of add-on type.

State law allows income from deposits and investments to be credited to either the General Fund or the fund making the investment. The School District's policy is to credit interest income from deposits and investments to each fund holding the deposits or investments in a proportional manner. Then, at the end of each fiscal year, each fund transfers all of these earnings into the General Fund.

Custodial Credit Risk: Custodial credit risk is the risk that, in the event of a bank failure, the School District's deposits may not be returned. The School District's deposit policy requires deposits in excess of the depository insurance maximums to be 100% collateralized as required by South Dakota Codified Law. The financial institutions where the collateral is held must be a member of the FDIC. As of June 30, 2019, the financial institution that holds the School District's deposits was properly collateralized.

The actual bank balances at June 30, 2019, were as follows:

Insured (FDIC/NCUA) Uninsured, collateral jointly held by state's/School District's agent in the name of the state and the pledging state	\$ 500,000
and the pledging financial institution	 3,686,910
Total deposits	\$ 4,186,910

The School District's carrying amount of deposits at June 30, 2019, was \$2,980,553. Reconciliation of deposits to government-wide statement of net position:

Cash and cash equivalents Add: Fiduciary funds cash (not included in government-wide statement of net position) Less: SDFIT GCR included in cash and cash equivalents	\$ 4,098,821 64,451 (1,182,719)
Total reconciled deposits	\$ 2,980,553

Investments

In general, SDCL 4-5-6 permits School District funds to be invested only in (a) securities of the United States and securities guaranteed by the United States Government either directly or indirectly; or (b) repurchase agreements fully collateralized by securities described in (a) above; or (c) in shares of an open-end, no-load fund administered by an investment company whose investments are in securities described in (a) above and repurchase agreements described in (b) above. Also, SDCL 4-5-9 requires investments to be in the physical custody of the political subdivision, or they may be deposited in a safekeeping account with any bank or trust company designated by the political subdivision as its fiscal agent.

The South Dakota Public Fund Investment Trust (SDFIT) Government Cash Reserve Fund (GCR) is an unrated external investment pool created for South Dakota local government investing purposes. It is regulated by a nine-member board with representation from municipalities, school districts, and counties. At June 30, 2019, the School District held \$1,182,719 in the SDFIT GCR.

The net asset value (NAV) of the SD FIT GCR is kept at one dollar per share by adjusting the rate of return on a daily basis. Earnings are credited to each account on a monthly basis. Since the School District has ready access to the cash, it is reported as cash and cash equivalents.

Measured at NAV:

	Amortized Cost	Unfunded _Commitments_	Redemption Frequency	Redemption Notice Period
SDFIT GCR	\$ 1,182,719	-	1 day	1 day

The objective of the GCR is to maintain a high degree of liquidity and safety of principal through investment in short-term securities as permitted for South Dakota public agencies under South Dakota law. GCR is authorized by investment policy and statute to invest public funds in obligations of the U.S. government, its agencies and instrumentalities, and repurchase agreements, provided that the underlying collateral consists of obligations of the U.S. government, its agencies and instrumentalities, and repurchase agreements, provided that the underlying collateral consists of obligations of the U.S. government, its agencies and instrumentalities, and that GCR's custodian takes delivery of the collateral either directly or through an authorized custodian.

Custodial Credit Risk – The risk that, in the event of the failure of the counterparty, the School District will not be able to recover the value of its investments or collateral securities that are in the possession of an outside party. The School District does not have an investment policy for custodial risk.

Interest Rate Risk – The School District does not have a formal investment policy that limits investment maturities as a means of managing its exposure to fair value losses arising from increasing interest rates.

Credit Risk – State law limits eligible investments for School Districts, as discussed above. The School District has no investment policy that would further limit its investment choices. As of June 30, 2019, the School District's investment in the SD FIT GCR was unrated.

Concentration of Credit Risk – The School District places no limit on the amount that may be invested in any one issuer. One hundred percent of the School District's investments are in the SD FIT GCR.

Note 3 - Receivables and Payables

Receivables and payables are aggregated in the government-wide financial statements. However, the fund financial statements present the receivable and payable information in a non-aggregated format. The amount recorded as due from other governments consists of \$23,677 from Federal sources, \$24,315 from State sources, and \$35,952 from County sources for grant revenue and utility tax revenues. The School District expects all receivables to be collected within one year. Based on the nature of the receivables, no allowances for estimates uncollectible have been established.

Note 4 - Changes in Capital Assets

A summary of changes in capital assets for the year ended June 30, 2019, is as follows:

Business-Type Activities		Balance 7/01/18	In	creases	Decre	eases		alance 5/30/19

Co-curricular				25,856
Total depreciation expense - governmental activities				\$ 140,120

Note 5 - Early Retirement Plan

The School District has adopted a policy whereby teachers between the ages of 55 and 64 that have been employed with the School District for a minimum of 15 years are eligible for early retirement. The one-time benefit is \$25,000. Payment is made in one lump sum to SDRS on behalf of the retiree. During the year ended June 30, 2019, one early retirement payment was made.

Note 6 - Restricted Net Position

The following table shows the net position restricted for other purposes as shown on the statement of net position:

Purpose	Restricted By	ted By Amo	
Capital Outlay	Law	\$	1,757,526
Special Education	Law		1,261,120
Pension	Law		25,011
SDRS Benefits	Law		366,409
Total restricted net position		\$	3,410,066

Note 7 - Joint Ventures

The School District participates in the following joint venture:

North Central Special Education Cooperative, a multi-district cooperative service unit (Co-op) formed for the purpose of providing special education services to the member school districts. All members participate equally, and members of the Co-op are as follows:

Hitchcock-Tulare School District	Warner School District
Frederick Area School District	Langford Area School District
Northwestern Area School District	Groton Area School District
Doland School District	Leola School District
Edmunds Central School District	

The North Central Special Education Cooperative's governing board is composed of one representative from each member school district. The board is responsible for adopting the Co-op's budget and setting service fees at a level adequate to fund the adopted budget.

The School District retains no equity interest in the net position of the Co-op but does have a responsibility to fund deficits of the Co-op in proportion to the relative participation described above. At June 30, 2019, the North Central Special Education Cooperative had fund equity of \$293,527 and no long-term debt. Financial statements are available by contacting the North Central Special Education Cooperative.

Note 8 - Risk Management

The School District is exposed to various risks of loss related to torts; theft of, damage to, and destruction of assets; errors and omissions; injuries to employees; and natural disasters. During the year ended June 30, 2019, the School District managed its risks as follows:

Liability Insurance

The School District purchases liability insurance for risks related to torts; theft or damage to property; and errors and omission of public officials from a commercial insurance carrier. Settled claims resulting from these risks have not exceeded the liability coverage during the past three years.

Employee Health Insurance

The School District joined the South Dakota School District Health Benefits Fund (SD SDBF). This is a public entity risk pool currently operating as a common risk management and insurance program for South Dakota local governmental entities. The School District pays a monthly premium to the pool to provide health insurance coverage for its employees. The pool purchases reinsurance coverage with the premiums it receives from the members. The coverage provides for deductibles ranging from \$1,500 to \$2,500, and \$3,000 to \$5,000 for single and family policies, respectively, and 20% coinsurance.

The School District does not carry additional health insurance to pay claims in excess of this upper limit. Settled claims from these risks have not exceeded the liability coverage during the past three years.

Worker's Compensation Insurance

The School District participates, with several other educational units and related organizations in South Dakota, in the Association of School Boards Worker's Compensation Fund Pool, which provided worker's compensation insurance coverage for participating members of the pool. The School District is responsible for payment of a premium to the insurance pool along with other pool participants. The School District may also be responsible for additional assessments in the event the pool is determined by its board of trustees to have inadequate reserves to satisfy current obligations or judgments. Additional assessments, if any, are to be determined on a prorated basis based upon each participant's percentage of contribution in relation to the total contributions to the pool of all participants for the year in which the shortfall occurs. The pool provides loss coverage to all participants through pool-retained risk retention and through insurance coverage purchased by the pool in excess of the retained risk. For the year ended June 30, 2019, the pool's retained risk was \$500,000 per occurrence with additional insurance purchased from a private insurance company for an additional \$500,000 for total coverage of \$1,000,000 per occurrence. There was no additional assessment charged to the pool members for the year ended June 30, 2019.

Unemployment Benefits

The School District has elected to be self-insured and retain all risk for liabilities resulting from claims for unemployment benefits.

During the year ended June 30, 2019, no claims for unemployment benefits were paid. At June 30, 2019, no claims had been filed for unemployment benefits and none are anticipated in the next fiscal year.

Note 9 - Interfund Transfers

Interfund transfers for the year ended June 30, 2019, were as follows:

		Transfers To							
Transfers From		General Fund		Food Service Fund		Drivers Ed Fund			
Major Funds: General Fund	Ś	_	Ś	17.658	Ś	3,419			
Capital Outlay Fund	3	44,608	Ŷ	-	Ŷ				
Pension Fund		28,000		-		-			

The School District transferred money from the General Fund to the Food Service Fund and Drivers Ed Fund to supplement the funds. The School District also transferred money from the Capital Outlay Fund and Pension Fund to the General Fund to supplement the fund and reduce the balances remaining in the Pension Fund. These interfund transfers are not violations of the statutory restrictions on interfund transfers. Also during 2019, the Capital Outlay Fund purchased equipment for \$13,396 which was transferred to the Food Service Fund.

Note 10 - Pension Plan

Plan Information

All employees, working more than 20 hours per week during the year, participate in the South Dakota Retirement System (SDRS), a cost sharing, multiple-employer, defined benefit pension plan administered by SDRS to provide retirement benefits for employees of the State of South Dakota and its political subdivisions. The SDRS provides retirement, disability, and survivor benefits. The right to receive retirement benefits vests after three years of credited service. Authority for establishing, administering, and amending plan provisions are found in South Dakota Codified Law 3-12. The SDRS issues a publicly available financial report that includes financial statements and required supplementary information. That report may be obtained at http://www.sdrs.sd.gov/publications/ or by writing to the SDRS, PO Box 1098, Pierre, SD 57501-1098 or by calling (605) 773-3731.

Benefits Provided

SDRS has three different classes of employees, Class A general members, Class B public safety and judicial members, and Class C Cement Plant Retirement Fund members.

Members that were hired before July 1, 2017, are Foundation members. Class A Foundation members and Class B Foundation members who retire after age 65 with three years of contributory service are entitled to an unreduced annual retirement benefit. An unreduced annual retirement benefit is also available after age 55 for Class A Foundation members where the sum of age and credited service is equal to or greater than 85 or after age 55 for Class B Foundation judicial members where the sum of age and credited service is equal to or greater than 80. Class B Foundation public safety members can retire with an unreduced annual retirement benefit after age 55 with three years of contributory service. An unreduced annual retirement benefit is also available after age 45 for Class B Foundation public safety members where the sum of age and credited service is equal to or greater than 75. All Foundation retirement benefits that do not meet the above criteria may be payable at a reduced level.

Members that were hired on/after July 1, 2017, are Generational members. Class A Generational members and Class B Generational judicial members who retire after age 67 with three years of contributory service are entitled to an unreduced annual retirement benefit. Class B Generational public safety members can retire with an unreduced annual retirement benefit after age 57 with three years of contributory service. At retirement, married Generational members may elect a single-life benefit, a 60 percent joint and survivor benefit, or a 100 percent joint and survivor benefit. All Generational retirement benefits that do not meet the above criteria may be payable at a reduced level. Generational members will also have a variable retirement account (VRA) established, in which they will receive up to 1.5 percent of compensation funded by part of the employer contribution. VRAs will receive investment earnings based on investment returns.

Legislation enacted in 2017 established the current COLA process. At each valuation date:

- Baseline actuarial accrued liabilities will be calculated assuming the COLA is equal to the long-term inflation assumption of 2.25%.
- If the fair value of assets is greater than or equal to the baseline actuarial accrued liabilities, the COLA will be:
 - The increase in the 3rd quarter CPI-W, no less than 0.5% and no greater than 3.5%.
- If the fair value of assets is less than the baseline actuarial accrued liabilities, the COLA will be:
 - The increase in the 3rd quarter CPI-W, no less than 0.5% and no greater than a restricted maximum such that, if the restricted maximum is assumed for future COLAs, the fair value of assets will be greater or equal to the accrued liabilities.

All benefits except those depending on the member's accumulated contributions are annually increased by the Cost-of-Living Adjustment.

Contributions

Per SDCL 3-12, contribution requirements of the active employees and the participating employers are established and may be amended by the SDRS Board. Covered employees are required by state statute to contribute the following percentages of their salary to the plan: Class A Members, 6.0% of salary; Class B Judicial Members, 9.0% of salary; and Class B Public Safety Members, 8.0% of salary. State statute also requires the employer to contribute an amount equal to the employee's contribution. The School District's share of contributions to the SDRS for the fiscal years ending June 30, 2019, 2018, and 2017, were \$75,045, \$73,169 and \$72,636, respectively, equal to the required contributions each year.

Pension Liabilities (Assets), Pension Expense, and Deferred Outflows of Resources and Deferred Inflows of Resources to Pensions

At June 30, 2018, SDRS is 100.02% funded and accordingly has a net pension asset. The proportionate share of the components of the net pension asset of SDRS for the School District as of the measurement period ending June 30, 2019, and reported by the School District as of June 30, 2019, are as follows:

Proportionate share of pension liability Less proportionate share of net pension restricted for pension benefits	\$ 7,235,816 7,237,196
Proportionate share of net pension liability (asset)	\$ (1,380)

At June 30, 2019, the School District reported a liability (asset) of (\$1,379) for its proportionate share of the net pension liability (asset). The net pension liability (asset) was measured as of June 30, 2018, and the total pension liability (asset) used to calculate the net pension liability (asset) was based on a projection of the School District's share of contributions to the pension plan relative to the contributions of all participating entities. At June 30, 2018, the School District's proportion was 0.05914810%, which is a decrease of 0.0004347% from its proportion measured as of June 30, 2017.

For the year ended June 30, 2019, the School District recognized pension expense of \$100,797. At June 30, 2019, the School District reported deferred outflows of resources and deferred inflows of resources related to pensions from the following sources:

	Deferred Outflows of Resources		Deferred Inflows of Resources	
Difference between expected and actual experience	\$	52,139	\$	-
Changes in assumption		350,223		-
Net difference between projected and actual earnings on				
pension plan investments		-		104,256
Changes in proportion and difference between School District				
contributions and proportionate share of contributions		2,831		10,953
School District contributions subsequent to the measurement date		75,045		-
Total	\$	480,238	\$	115,209

There is \$75,045 reported as deferred outflow of resources related to pensions resulting from School District contributions subsequent to the measurement date that will be recognized as a reduction of the net pension liability in the year ending June 30, 2020. Other amounts reported as deferred outflows of resources and deferred inflows of resources related to pensions will be recognized in pension expense (revenue) as follows:

Year Ended June 30:	Amount
2020 2021 2022 2023	\$ 184,616 136,275 (19,555) (11,352)
Total	\$ 289,984

Actuarial Assumptions

The total pension liability (asset) in the June 30, 2018, actuarial valuation was determined using the following actuarial assumptions, applied to all periods included in the measurement:

Inflation	2.25%
Salary increases	Graded by years of service, from 6.50% at entry to 3.00% after 25 years of service
Discount Rate	6.50% net of plan investment expense

Mortality rates are based on 97% of the RP-2014 Mortality Table, projected generationally with Scale MP-2016, white collar rates for females and total dataset rates for males. Mortality rates for disabled members were based on the RP-2014 Disabled Retiree Mortality Table, projected generationally with Scale MP-2016.

A detailed experience analysis covering the period from June 30, 2011 to June 30, 2016, was conducted and appropriate modifications in the economic and demographic assumptions were made effective with the June 30, 2017, actuarial valuation.

Investment portfolio management is the statutory responsibility of the South Dakota Investment Council (SDIC), which may utilize the services of external money managers for management of a portion of the portfolio. SDIC is governed by the Prudent Man Rule (i.e., the council should use the same degree of care as a prudent man). Current SDIC investment policies dictate limits on the percentage of assets invested in various types of vehicles (equities, fixed income securities, real estate, cash, private equity, etc.). The long-term expected rate of return on pension plan investments was determined using a method in which best-estimate ranges of expected future real rates of return (expected returns, net of pension plan investment expense and inflation) are developed for each major asset class. These ranges are combined to produce the long-term expected rate of return by weighing the expected future real rates of return by the target asset allocation percentage and by adding expected inflation. Best estimates of real rates of return for each major asset class included in the pension plan's target asset allocation as of June 30, 2017, (see the discussion of the pension plan's investment policy) are summarized in the following table using geometric means:

Asset Class	Target Allocation	Long-Term Expected Real Rate of Return
Global Equity	58.0%	4.8%
Fixed Income	30.0%	1.8%
Real Estate	10.0%	4.6%
Cash	2.0%	0.7%
Total	100.0%	

Discount Rate

The discount rate used to measure the total pension liability (asset) was 6.50%. The projection of cash flows used to determine the discount rate assumed that employee contributions will be made at the current contribution rate and that matching employer contributions will be made at rates equal to the member rate. Based on these assumptions, the pension plan's fiduciary net position was projected to be available to make all future benefit payments of current plan members. Therefore, the long-term expected rate of return on pension plan investments was applied to all periods of projected benefit payments to determine the total pension liability (asset).

Sensitivity of Asset to Changes in the Discount Rate

The following presents the School District's proportionate share of net pension liability (asset) calculated using the discount rate of 6.50% as well as what the School's proportionate share of the net pension liability (asset) would be if it were calculated using a discount rate that is 1-percentage point lower (5.50%) or 1-percentage point higher (7.50%) than the current rate:

	Current					
	1% Decrease		Discount Rate		1% Increase	
School District's proportionate share of						
the net pension liability (asset)	\$	1,041,887	\$	(1,380)	\$	(850 <i>,</i> 020)

Pension Plan Fiduciary Net Position

Detailed information about the plan's fiduciary net position is available in the separately issued SDRS financial report.

Frederick Area School District No. 6-2 Budgetary Comparison Schedules – Budgetary Basis – Pension Fund

	Budgeted Amounts Original Final				Actual Amounts (Budgetary Basis)		Variance with Final Budget Positive (Negative)	
Revenues Revenue from local sources								
Taxes: Prior year's ad valorem taxes Penalties and interest on taxes	\$	-	\$	-	\$	131 48	\$	131 48
Total revenues		-		-		179		179
Excess of Revenue over Expenditures		-		-		179		179
Other Financing Sources (Uses) Transfers out		(50,000)		(50,000)		(28,000)		22,000
Total other financing sources (uses)		(50,000)		(50,000)		(28,000)		22,000
Net Change in Fund Balance		(50,000)		(50,000)		(27,821)		22,179
Fund Balance - Beginning		52,810		52,810		52,810		-
Fund Balance - Ending	\$	2,810	\$	2,810	\$	24,989	\$	22,179

Note 1 - Basis of Presentation

The budgetary comparison schedules have been prepared using the modified accrual basis of accounting. The budgetary comparison schedules present expenditures for capital outlay purposes within each function, while the governmental funds statement of revenues, expenditures and changes in fund balance presents capital outlay expenditures as a separate function.

Note 2 - Budgetary Legal Requirements

Budgets and Budgetary Accounting

The School District followed these procedures in establishing the budgetary data reflected in the financial statements:

- 1. Prior to the first regular School Board meeting in May of each year, the School Board causes to be prepared a proposed budget for the next fiscal year according to the budgetary standards prescribed by the Auditor General.
- 2. The proposed budget is considered by the School Board at the first regular meeting held in the month of May of each year.
- 3. The proposed budget is published for public review no later than July 15 each year.
- 4. Public hearings are held to solicit taxpayer input prior to the approval of the budget.
- 5. Before October 1 of each year, the School Board must approve the budget for the ensuing fiscal year for each fund, except trust and agency funds.
- 6. After adoption by the School Board, the operating budget is legally binding, and actual expenditures of each fund cannot exceed the amounts budgeted, except as indicated in Number 8.
- 7. A line item for contingencies may be included in the annual budget. Such a line item may not exceed 5% of the total School District budget and may be transferred by resolution of the School Board to any other budget category, except for capital outlay, that is deemed insufficient during the year.
- 8. If it is determined during the year that sufficient amounts have not been budgeted, state statute allows adoption of supplemental budgets when moneys are available to increase legal spending authority.
- 9. Unexpended appropriations lapse at year-end unless encumbered by resolution of the School Board.
- 10. Formal budgetary integration is employed as a management control device during the year for the General Fund, Capital Project Funds, and Special Revenue Funds. Formal budgetary integration is not employed for Debt Service Funds because effective budgetary control is alternatively achieved through general obligation bond indenture provisions.

Frederick Area School District No. 6-2 Schedule of Employer's Share of Net Pension Liability (Asset) Year Ended June 30, 2019

Pension Plan	Fiscal Year Ending	Employer's Percentage of the Net Pension Liability (Asset)	Employer's Proportionate Share of the Net Pension Liability (Asset) (a)	Employer's Covered Payroll (b)	Employer's Proportionate Share of the Net Pension Asset as a Percentage of its Covered Payroll (a/b)	Plan Fiduciary Net Position as a Percentage of the Total Pension Liability (Asset)
SDRS	6/30/2019	0.0591%	\$ (1,380)	\$ 1,219,480	-0.1%	100.02%
SDRS	6/30/2018	0.0596%	(5,407)	1,210,603	-0.4%	100.1%
SDRS	6/30/2017	0.0545%	183,944	1,035,460	17.8%	96.9%
SDRS	6/30/2016	0.0539%	(228,630)	984,164	-23.2%	104.1%
SDRS	6/30/2015	0.0552%	(397,875)	965,734	-41.2%	107.3%

*GASB Statement No. 68 requires ten years of information to be presented in this table. However, until a full 10year trend is compiled, the School District will present information for those years for which information is available.

Note: The information disclosed for each fiscal year is reported as of the measurement date of the net pension liability (asset) which is June 30 of the preceding fiscal year.

Pension Plan	Fiscal Year Ending	R	ntutorily equired ntribution (a)	St R	Contributions Statutorily Required Contribution (b)		Contribution Deficiency (Excess) (a-b)		Covered Payroll (d)	Contributions Percentage of Covered- Employee Payroll (b/d)	
SDRS	6/30/2019	\$	75,045	\$	75,045	\$	-	\$	1,250,723	6.0%	
SDRS	6/30/2018		73,169		73,169		-		1,219,480	6.0%	
SDRS	6/30/2017		72,636		72,636		-		1,210,603	6.0%	
SDRS	6/30/2016		62,128		62,128		-		1,035,460	6.0%	
SDRS	6/30/2015		59,050		59,050		-		984,164	6.0%	

*GASB Statement No. 68 requires ten years of information to be presented in this table. However, until a full 10-year trend is compiled, the School District will present information for those years for which information is available.

Changes in Benefit Terms

No significant changes.

Changes of Assumptions

Legislation enacted in 2017 modified the SDRS COLA. For COLAs first applicable in 2018, the SDRS COLA will equal the percentage increase in the most recent third calendar quarter CPI-W over the prior year, no less than 0.5% and no greater than 3.5%. However, if the FVFR assuming the long-term COLA is equal to the baseline COLA assumption (currently 2.25%) is less than 100%, the maximum COLA payable will be limited to the increase that, if assumed on a long-term basis, results in a FVFR equal to or exceeding 100%. That condition existed as of June 30, 2017, and exists again this year as of June 30, 2018. Future COLAs are assumed to equal the current restricted maximum COLA which was 1.89% as of June 30, 2017, and is 2.03% as of June 30, 2018.

CPAs & BUSINESS ADVISORS

Independent Auditor's Report on Internal Control over Financial Reporting and on Compliance and Other Matters Based on an Audit of Financial Statements Performed in Accordance with *Government Auditing Standards*

The School Board Frederick Area School District No. 6-2 Frederick, South Dakota

We have audited, in accordance with auditing standards generally accepted in the United States of America and the standards applicable to financial audits contained in *Government Auditing Standards*, issued by the Comptroller General of the United States, the financial statements of the governmental activities, the business-type activities, each major fund, and the aggregate remaining fund information of Frederick Area School District No. 6-2 (the School District) as of and for the year ended June 30, 2019, and the related notes to the financial statements, which collectively comprise the School District's basic financial statements, and have issued our report thereon dated January 16, 2020.

Internal Control over Financial Reporting

In planning and performing our audit of the financial statements, we considered the School District's internal control over financial reporting (internal control) to determine the audit procedures that are appropriate in the circumstances for the purpose of expressing our opinions on the financial statements, but not for the purpose of expressing an opinion on the effectiveness of the School District's internal control. Accordingly, we do not express an opinion on the effectiveness of the School District's internal control.

A *deficiency in internal control* exists when the design or operation of a control does not allow management or employees, in the normal course of performing their assigned functions, to prevent, or detect and correct, misstatements on a timely basis. A *material weakness* is a deficiency, or a combination of deficiencies, in internal control, such that there is a reasonable possibility that a material misstatement of the entity's financial statements will not be prevented, or detected and corrected, on a timely basis. A *significant deficiency* is a deficiency, or a combination of deficiencies, in internal control weakness, yet important enough to merit attention by those charged with governance.

Our consideration of internal control over financial reporting was for the limited purpose described in the first paragraph of this section and was not designed to identify all deficiencies in internal control over financial reporting that might be material weaknesses or significant deficiencies and, therefore, material weaknesses or significant deficiencies may exist that have not been identified. We did identify certain deficiencies in internal control, described in the accompanying schedule of findings as 2019-001 and 2019-002 to be material weaknesses.

Compliance and Other Matters

As part of obtaining reasonable assurance about whether the School District's financial statements are free from material misstatement, we performed tests of its compliance with certain provisions of laws, regulations, contracts, and grant agreements, noncompliance with which could have a direct and material effect on the determination of financial statement amounts. However, providing an opinion on compliance with those provisions was not an objective of our audit, and accordingly, we do not express such an opinion. The results of our tests disclosed no instances of noncompliance or other matters that are required to be reported under *Government Auditing Standards*.

Frederick Area School District's Response to Findings

The School District's response to the findings identified in our audit are described in the schedule of findings. The School District's response was not subjected to the auditing procedures applied in the audit of the financial statements and, accordingly, we express no opinion on it.

Purpose of this Report

The purpose of this report is solely to describe the scope of our testing of internal control and compliance and the results of that testing, and not to provide an opinion on the effectiveness of the entity's internal control or on compliance. This report is an integral part of an audit performed in accordance with *Government Auditing Standards* in considering the entity's internal control and compliance. Accordingly, this communication is not suitable for any other purpose. However, as required by South Dakota Codified Law 4-11-11, this report is a matter of public record, and its distribution is not limited.

Erde Bailly LLP

Aberdeen, South Dakota January 16, 2020

Current Audit Findings and Recommendations

Finding 2019-001 - Lack of Segregation of Duties

Criteria: A good system of internal controls contemplates an adequate segregation of duties so that no one individual handles a transaction from its inception to its completion.

Condition: Frederick Area School District No. 6-2 has a limited number of office personnel and, accordingly, does not have adequate internal accounting controls in revenue, expenditures, and payroll functions due to a lack of segregation of duties.

Cause: The School District has an insufficient number of staff members to adequately separate duties.

Effect: This condition increases the risk that fraud or errors might occur and not be detected in the financial reporting process.

Recommendation: Although it is recognized that the number of office staff may not be large enough to permit an adequate segregation of duties in all respects, it is important that management and those charged with governance be aware of this condition. We recommend that the School Board exercise adequate oversight of the accounting function.

Views of Responsible Officials: Management agrees with the finding.

Finding 2019-002 - Preparation of Financial Statements and Footnotes and Material Proposed Adjustments to the Financial Statements

Criteria: An organization's internal control structure should provide for the recording of all necessary material adjustments and the preparation of financial statements and footnotes in accordance with generally accepted accounting principles.

Condition: Frederick Area School District No. 6-2 does not have an internal control system designed to provide for the preparation of the financial statements being audited, including required footnotes and disclosures and all necessary material audit adjustments, in accordance with generally accepted accounting principles.

Cause: The School District does not have adequate staff trained to prepare the financial statements and footnotes.

Effect: This condition may affect the School District's ability to record, process, summarize, and report financial data consistent with the assertions of management in the financial statements.

Recommendation: This circumstance is not unusual in an organization of this size. It is the responsibility of management and those charged with governance to make the decision whether to accept the degree of risk associated with this condition because of cost or other considerations.

Views of Responsible Officials: Management agrees with the finding.
